

National Immunization Awareness Month

Vaccines are the best defense we have against these and other serious diseases, and it's important to make sure that you're up to date on all recommended vaccines.

August is an ideal time to make sure everyone is up-to-date on vaccines before heading back to school and to plan ahead to receive flu vaccine. Getting vaccinated is an easy way to stay healthy all year round.

By making sure your vaccinations are up to date, you can help prevent harmful diseases from affecting you and your family.
